Cheetah Spots Rock Painting

Cheetahs have 2000-3000 black spots over its body. Amazingly each cheetah has its very own pattern of spots. This is a fun easy activity to make cheetah spots, lots of cheetah spots. Decorate with paint any size rock with cheetah colors and black spots. Use your painted rocks to decorate your yard, next party or give as gifts to your cheetah loving friends.

This is a great activity for the whole family.

Supplies:

- medium sized smooth rocks
- acrylic paints (1 or 2 bottles - yellow/gold & 1 bottle - black)*
- foam brushes to paint yellow/gold
- small or medium paintbrushes to make spots
- paper plates for holding paint
- wet cloths or papertowels for easy clean up

How to:

1. Paint each rock solid yellow/gold with a foam brush and acrylic paints.
2. Let rock dry completely and paint the other side if desired.
3. The really fun part, use the black paint & make different sized black spots on one side.
4. Let the rocks dry completely.
5. Paint the other side with black spots.
6. Clean up & wash paint brushes.

*Amount of paint needed depends on the size and how many rocks you are painting.

Have fun making your cheetah rocks & remember to share what you've learned with family and friends.
